OFFICE OF THE REVENUE COMMISSIONER IN MYSORE, Bangalore, Dated 22nd May 1951.

V. VEDAVYAS ACHARYA, *Revenue Commissioner.*

OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY IN MYSORE, BANGALORE.

(HEALTH OF LIVE-STOCK DURING APRIL 1951).

Notification dated 14th May 1951.

In their order of severity, outbreaks of Rinderpest, Black-quarter, Anthrax, Hæmorrhagic-septicæmia, Foot and Mouth, Sheep-pox, Ranikhet, and Contagious-goat pleuro-pneumonia were encountered in the State during April 1951. Altogether 135 villages were reported to have been affected by one or the other of the several contagious and infectious diseases, as against 177 villages during the previous month. The number of outbreaks was highest in Mysore, Kolar and Bangalore Districts, while Chikmagalur, Hassan and Mandya were least affected. These diseases accounted for 678 attacks, of which 519 succumbed as against 920 attacks and 656 deaths during the previous month. The Departmental staff conducted 21,265 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention other prophylactic measures were adopted against Foot and Mouth disease.

Twelve outbreaks of Rinderpest of which three were among sheep and goats were registered in Kadur, Narasimharajapura, Koppa, Honnali and Chitaldrug Taluks accounting for 94 attacks among cattle and 125 among sheep, of which 58 cattle and 70 sheep succumbed. The spread of Rinderpest during the month is attributed to the infection at Rampur Cattle Fair in Honnali Taluk during February last. Prompt measures of control are being undertaken by the Department to check its further spread and so far 1,633 cattle and 905 sheep in the infected villages and 6,481 cattle and 249 sheep in 29 neighbouring villages have been protected against this disease.

Diseases caused by internal parasites were reported from 94 villages resulting in 63 deaths as against 86 villages accounting for 46 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 6,808 animals as against 6,238 animals during the previous month.

The rest of the live-stock remained free from diseases during the month, and fodder and water were generally available throughout the State.
